CONFERENCE ID: 363 519 197#

Is your home a healthy home?

You can't see it... but it's there

For their size, children breathe up to twice as much air as adults.

They also drink more water.

When they get harmful chemicals in their bodies, it's a bigger dose compared to adults.

Your housing may increase the risk for injuries and may cause illness.

In Collaboration with the following Agencies:

Southwest Center for Pediatric Environmental Health
